V GODWIN

Full Stack Developer | React.js · TypeScript · Python | REST APIs & Data Platforms | **NetApp** Enterprise Experience

Bengaluru, India | +91 9392236869 | godwinv7849@gmail.com | linkedin.com/in/godwinv7849 | godwin-web-dev.onrender.com

PROFESSIONAL SUMMARY

Full Stack Developer with **2 years 1 month** of experience building, testing, and maintaining web applications in **React.js, TypeScript, and JavaScript**, with RESTful APIs and server-side logic in **FastAPI and Flask** backed by MySQL, MongoDB, PostgreSQL, and Oracle. Delivered **3 production applications for NetApp**, including a legacy ExtJS-to-React migration with reusable Material UI and AG Grid components. Also supports **Kafka, Airflow, and Kubernetes** pipelines at **3M+ message** scale. **Immediate joiner.**

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Material UI, AG Grid, HTML5, CSS3, State Management, Memoization
Backend & APIs: Python, FastAPI, Flask, Django (ORM), Node.js, RESTful APIs, Pydantic, Authentication & Access Control
Databases: SQL, MySQL, MongoDB, PostgreSQL, Oracle, Dremio
Data & Messaging: Kafka, Airflow, Spark, Data Pipelines, Data Quality Monitoring
DevOps & Tools: Docker, Kubernetes, Jenkins (CI/CD), Linux, Git, Jira, Dynatrace, AWS (S3), Google Cloud (Foundation)
Testing & Practices: pytest, Unit Testing, Troubleshooting & Debugging, Production Support, Incident Handling

PROFESSIONAL EXPERIENCE

Software Engineer, Onstak Technologies, Bengaluru | **Client: NetApp** Sep 2024 – Present

- Delivered **3 production applications for NetApp** (DLH Insights Dashboard, CRS Pipeline Dashboard, SmartSolve UI Modernization) across frontend, backend, and deployment.
- Recovered Kafka consumer groups with **3M+ message lag** protecting per-minute ASUP SLA thresholds; re-queued failed ASUP events after Dremio data dips; enabled pod autoscaling after Dynatrace showed weekend peak-load breaches.
- Monitored **25+ Airflow jobs across 7 data sources**; cleared stuck DAG runs, validated row counts against a 1-week baseline, and backfilled missing data.
- Supported production patching of ∼**10 Dremio worker nodes (16 executors)** with no query interruption, verified across 5 interfaces.
- Containerized the legacy Spark framework and an internal cache utility with Docker; wrote **pytest** suites covering API responses and edge cases.

KEY PROJECTS

SmartSolve UI Modernization | **Client: NetApp**
Modernized a legacy ExtJS quality-management application to React.
Tech: React · TypeScript · Material UI · AG Grid

- **Led the ExtJS-to-React migration** with reusable components, including an AG Grid table (search, filter, sort) and a side-by-side text diff component used across modules.
- Persisted UI state through the user-preferences API; added authentication, route-level access checks, and memoized rendering; fixed production defects with QA.

DLH Insights Dashboard | **Client: NetApp**
Data-lake monitoring platform: users, storage, node health, data quality, incidents, and pipelines in one view.
Tech: React · TypeScript · Material UI · FastAPI · PostgreSQL · Dremio · Docker · Kubernetes

- **Designed and built** FastAPI services and the React UI; introduced user-growth tracking and a data quality check on the 20 most-used tables.
- **Designed** an EPROD pipeline monitor using Kafka lag over 4 look-back windows; **automated** a daily Dremio-to-PostgreSQL sync with email alerts, cutting repeated queries.

CRS Pipeline Dashboard | **Client: NetApp**
One dashboard replacing manual checks across Airflow jobs, view refreshes, and server health.
Tech: Python · Flask · MySQL · Oracle · Airflow · Dynatrace · Kubernetes

- **Built** Flask integrations across MySQL, Oracle, and Dynatrace for 3 Airflow job groups; added Excel export; **deployed** on Kubernetes with Ingress and health probes.

Smartphone Addiction Predictor | **Personal Project**
Tech: FastAPI · scikit-learn · TensorFlow · React · TypeScript · Firebase Auth

- **Built solo** a web app serving 4 ML models (incl. 1D CNN) from 19 survey inputs, with Pydantic validation, CORS setup, and Firebase authentication.

EDUCATION & CERTIFICATIONS

B.Tech, Information Technology | Sree Vidyanikethan Engineering College, India Jan 2021 – May 2024
Certifications: Python Pro Bootcamp (Udemy) · Google Cloud Computing Foundation · HackerRank Python (Basic)
